Testimonial for ABIRAMI BASKARAN

3 May 2023

Dear Scholarship Committee,

It's my pleasure to recommend Abirami for Scholarship. Since she joined SP as a Direct-Year 2 student of School of EEE, Singapore Polytechnic(SP) in April 2022, Abirami has demonstrated a consistent passion for Computer Engineering and a deep understanding of its principles. I was her lecturer for Mobile Application Development module and her personal tutor. She impressed me as being responsible, reliable, dedicated, analytical, forward thinking, organised, curious with a growth mind-set.

She actively participated in various academic competitions, where she showcased her technical abilities, problem-solving skills and leadership. Led by Abirami, her project team took part in Solve for Tomorrow 2022 Singapore competition and entered into top 5 in post-secondary category. Abirami also represented SP in a hackathon organized by PSA in Oct 2022.

Besides, Abirami is also in charge of a few school activities, like organizing School of EEE's very first Design competition, where she led the subcommittee in the EEE club for publicizing the event. Through her participation in these activities, Abirami led and worked collaboratively with her team, communicated effectively, and demonstrated strong leadership qualities.

Despite her achievements in academic and CCA, Abirami remains humble and always strives for further improvement. She is grateful for the opportunities that have come to her and is always willing to learn and grow. Abirami is a valuable asset to the SP community.

Abirami is polite, responsible, dedicated and hardworking.

I wholeheartedly recommend Abirami for the Scholarship.

Dr Zhu Bochun
Specialist
School of Electrical & Electronic Engineering
