To Whom It May Concern:

### **TESTIMONIAL FOR ABIRAMI BASKARAN**

Abirami Baskaran completed an internship with Land Systems at Defence Science and Technology Agency (DSTA) from 02 June 2025 to 01 August 2025.

During her two-month internship, Abirami demonstrated strong initiative and dedication to her work. She proactively sought out opportunities to contribute by approaching her mentors for tasks and taking ownership of projects. Even in her final week, she willingly took on a new assignment, showing her commitment to continuous learning and contribution until the very end of her internship.

One notable highlight of her internship was her involvement in a project related to the National Day Parade. Abirami displayed creativity and persistence, constantly refining her ideas to achieve the best possible outcome. She independently managed client communications with professionalism and carried the project forward with a high level of responsibility.

Although her background is primarily in software programming, Abirami embraced the chance to learn new skills beyond her comfort zone. Through hands-on experimentation and problem-solving, she gained exposure to mechanical aspects of the work and overcame multiple technical challenges to get the system working effectively.

Overall, Abirami has shown herself to be a motivated, adaptable, and resourceful individual who is not afraid to take initiative and push through difficulties. I believe she will continue to excel in her future endeavours.
